SIEMENS

INTERNATIONAL telcom report

Siemens Aktiengesellschaft, Berlin and Munich
Volume 14 (1991)

Index to Subjects

Issue/page

Broadband systems

A solid foundation for broadband ISDN
New CCITT recommendations for asynchronous transfer mode (ATM) pave the way for broadband ISDN
Frantzen, Viktor; Händel, Rainer 1/24

Networking aspects of broadband ISDN
New CCITT recommendations on broadband ISDN service aspects, network aspects, the user-network interface, and operations and maintenance
Frantzen, Viktor; Händel, Rainer 1/28

Guaranteeing B-ISDN transmission quality internationally
PARASOL consortium develops measurement technology for the future broadband network
Arweiler, Hans Werner 2/44

Measurement precision over broadband
Fault-tolerant encoding method improves ATM measurement technology for future broadband ISDN
Wolf, Andreas 3/48

Pacemaker for broadband communications
Asynchronous transfer mode technology will accelerate the introduction of broadband services
Fundneider, Oswald 5/26

Network-to-network
Linking local networks to form metropolitan area networks eases the way for broadband ISDN
Kraft, Ingo; Schenk, Heinrich 5/30

Europe's first MAN goes to Denmark
Public high-speed data network using DQDB standard handed over in Copenhagen
Knopf, Friedrich 6/17

Communication terminals and peripherals

Dial some style
Aesthetic form and high-tech function united in the "black line" design
Groebmair, Karlheinz 2/22

Running in the family
Four sizes of fax machines offer something for everyone
Stocker, Manfred 3/24

Flexible service: any time, any place
Preform speeds up communication with fax machines
Schreppel, Friedrich 3/26

No cords attached
megaset 930 – a new dimension in cordless telephones
Groebmair, Karlheinz 4/20

The changing telephone landscape
A look at the changes going on in the liberalized market for telephones
Spiss, Ernst 5/20

Communications test equipment

Acceptance testing made easy
NET3 testing for Euro-ISDN terminal equipment with the K1195 or K1197 protocol testers
Rosar, Werner 1/36

New measuring technology for SDH
The K4302 generator/analyzer together with the K9302 optical interface supports the development, production, commissioning and maintenance of digital transmission equipment to SDH standard
Fink, Helmuth; Rauchenecker, Konrad 5/46

Keeping tabs on leased data lines
The MSy90 measuring system provides fast access to units under test
Bretschneider, Günther; Peuser, Wolfgang 6/42

Fairs and exhibitions

Siemens communications technology at CeBIT '91
Preview 1/40

A Day at the Fair
A visit to the Siemens Stand at CeBIT '91
Pictorial 2/52

Communications in the spotlight
Siemens at Telecom '91 in Geneva
Pictorial 6/46

Metropolitan area network MAN

High-speed communications – the pulse of the economy
Deutsche Bundespost TELEKOM puts the MAN on trial in Munich and Stuttgart
Pfeiler, Rudolf; Rittsteiger, Georg 4/38

Network-to-network
Linking local networks to form metropolitan area networks eases the way for broadband ISDN
Kraft, Ingo; Schenk, Heinrich 5/30

Europe's first MAN goes to Denmark
Public high-speed data network using DQDB standard handed over in Copenhagen
Knopf, Friedrich 6/17

Microelectronics

Microsystems in digital communication
Innovation through partnership between systems development and microelectronics
Bruess, Rolf Juergen; Lerach, Lothar 4/4

From telephone card to crypto card
Security for every application with new chip card ICs
Hammerschmidt, Juergen; Krings, Gert 4/54

The heart of the 155-Mbit/s digital cross-connect
The 33 × 32 crosspoint matrix the first full-custom application on a gate array
Delker, Klaus; Kuschmider, Artur 6/27

Network management

Managing transmission networks
The position, structure and functions of transmission network management within the telecommunications management network
Tromballa, Wolfgang 2/28

Small network managers big in performance
DKVt2 digital channel distributors and DACSBASE software simplify the electronic control of private networks
Huber, Ursula 2/36

The network management challenge
Opportunities and implications of the telecommunications management network (TMN) for network operators and suppliers
Bogler, Gerhard; Sevcik, Max; Veronelli, Michael 5/34

Office communication

The modern Midas touch
Hicom Trading 300 – a new ISDN trading system for banks and stock exchanges
Jung, Harald M. 3/18

Giving the telephone vision
Video adds a new dimension to personal business communication
Röscheisen, Friedrich 5/7

Optical transmission

Optoelectronics for fiber-optic applications
Development, standardization, production and quality assurance of application-oriented fiber-optic semiconductor components
Althaus, Hans Ludwig; Heister, Gerd; Kuhn, Gerhard 1/32

Gateway to the gigabit range
Berlin V pilot project tests 2.5-Gbit/s digital transmission on optical fibers to the SDH standard
Proebster, Walter 3/32

Dependable fiber-optic transmission
Overhead channel evaluation at 3 Mbit/s with the SG30H service unit
Baardsgaard, Lars; Dömer, Josef; Müller, Karl 3/44

One approach to all submarine cables
Concept based on the MINISUB system proves commercially viable
Giebel, Wolfgang 4/22

Progress in optical technology
New advances promote the use of fiber-optics in communications systems and networks
Stegmeier, Herbert 5/4

Fiber-optic transmission with reserve capacity
Modular OLTS system with 2, 8 or 34 Mbit/s
Baardsgaard, Lars; Gilinsky, Odd; Trüg, Wolf 5/42

HEAG expands fiber loop capacity to 34 Mbit/s
Hessische Elektrizitäts-AG (HEAG) upgrades data network
Kerat, Hans-Josef; Rudolf, Dieter 6/24

Perspectives in telecommunications

Telecomunications technology on the road to the next century
Baur, Hans 1/2

More competition – greater opportunities
The world market and the single European market in 1992
Schmücking, Werner 2/5

Developing a national telecommunications industry
Economical and technological implications for newly industrialized countries
Sombeek, Peter 2/8

Telecommunications in Eastern Germany
Developments leading up to the year 2000
Rosenblatt, Joachim 3/6

Telephone and computer teamwork
PBX and Computer Teaming via Hicom and CallBridge
Schmücking, Werner 3/10

Microsystems in digital communication
Innovation through partnership between systems development and microelectronics
Bruess, Rolf Juergen; Lerach, Lothar 4/4

Euro-ISDN standards bring safety in planning
Siemens active in the IPNS Forum
Koxholt, Rolf 4/8

A European presence
Hicom 300 for communication without bounds
Lohmann, Wolfgang 4/10

Progress in optical technology
New advances promote the use of fiber-optics in communications systems and networks
Stegmeier, Herbert 5/4

Giving the telephone vision
Video adds a new dimension to personal business communication
Röscheisen, Friedrich 5/7

The world of mobile communications
A look at the prospects for public and private mobile radio
Becker, Karl-Fritz; Heim, Richard 6/5

Private communication

Communications with a smile
Beijing's Friendship Hotel hooks up to Hicom
Krause, Günther 1/9

ISDN makes a difference
Weidmüller GmbH boasts the best of communications company-wide with the Hicom 300 ISDN communication system
Eberlein, Klaus 1/12

ISDN brings a breath of fresh air
Ventilation systems manufacturer replaces analog telephone installation with the Hicom 300 ISDN communication system
Schmidt, Norbert 1/14

More competition – greater opportunities
The world market and the single European market in 1992
Schmücking, Werner 2/5

Mervyn's money-saving communications
Discount retailer uses advanced Siemens technology to interlink its outlets
Mattes, Andy W. 2/12

Common commitment from Siemens and IBM
Combined response to growing demand for computer-supported telephony
Beyschlag, Ulf 2/15

University of São Paulo's digital upgrade
Siemens PBX technology serves to integrate six campuses
Briales, Ana Maria A. 2/18

Small network managers big in performance
DKVt2 digital channel distributors and DACSBASE software simplify the electronic control of private networks
Huber, Ursula 2/36

Telephone and computer teamwork
PBX and Computer Teaming via Hicom and CallBridge
Schmücking, Werner 3/10

Expo '92 discovers Hicom
Siemens official PBX supplier in Seville
Pradas, Adrian 3/14

Set for Seville
Interview on the eve of next year's Expo '92 in Seville, Spain
Lampka, Herbert (Interview) 3/16

Euro-ISDN standards bring safety in planning
Siemens active in the IPNS Forum
Koxholt, Rolf 4/8

A European presence
Hicom 300 for communication without bounds
Lohmann, Wolfgang 4/10

Vistakon sees a bright future in ISDN
The pioneer of disposable contact lenses uses Siemens, IBM and ROLM technology to enhance call center operations
Tissot, Anthony F. 4/13

Real-world ISDN in the ninties
The role of the ROLM ISDN Project Office
Fliedner, Bernhard 4/14

IBM on line with Hicom
IBM in Finland revamps its network with the Hicom 300 ISDN communications system
Porkka, Ilkka; Ruusuvuori, Pauli 4/16

An infrastructure for universal communications
Siemens ICCS structured cabling system makes buildings more flexible
Kuhlin, Bernd 4/50

In the communications fast lane
Ford building Europe's first international private ISDN network with Hicom
Czaputa, Bruno; Dixon, William 5/11

Hicom takes off
Munich's new airport networks with Hicom communication system
Kunde, Gerhard; Lauenstein, Jochen 5/15

Hicom goes to school
Ghent University builds ISDN network based on Hicom
Lagasse, Paul 5/18

The world of mobile communications
A look at the prospects for public and private mobile radio
Becker, Karl-Fritz; Heim, Richard 6/5

PaCT accounts for banking success
Swiss bank's software developers are working on an ISDN island
Ewe, Jochen 6/8

The best of both worlds
Adding the power of the PBX to Centrex
Shute, Melodie 6/10

Dial-up data
Henrik Müller discusses the link between ISDN communication systems and data processing
Müller, Henrik (Interview) 6/14

The flexible solution for corporate networks
Network operators and users can benefit from networking with Hicom
Fischer, Norbert 6/28

Service spelled out in Chinese
Successful start for the Beijing Technology Training Center
Jenneskens, Uwe 6/44

Public communications systems

High-tech products for the international market
Bruchsal coordinating plant: EWSD manufacturing using state of the art technologies and logistics methods and support for EWSD plants on four continents
Mayser, Jörg K.H.; Strube, Wolfdietrich 1/16

Hungary expands text and data network
Siemens EDXS text and data switching system and ZD-A3/2 time-division multiplexer key components in the Hungarian network
Feczkó, Iván; Zenker, Lothar 1/20

A solid foundation for broadband ISDN
New CCITT recommendations for asynchronous transfer mode (ATM) pave the way for broadband ISDN
Frantzen, Viktor; Händel, Rainer 1/24

Networking aspects of broadband ISDN
New CCITT recommendations on broadband ISDN service aspects, network aspects, the user-network interface, and operations and maintenance
Frantzen, Viktor; Händel, Rainer 1/28

Developing a national telecommunications industry
Economical and technological implications for newly industrialized countries
Sombeek, Peter 2/8

Network digitization the economical way
Remote peripheral unit, based on Siemens' EWSD design, is the key element in the last phase of German network digitization
Imhof, Lutz; Scholz, Joachim 2/24

Knowledge the key to using technology
Training Center for Communication Networks at the leading edge for 40 years
Feicht, Ernst J.; Jenni, Armin A. 2/48

Telecommunications in Eastern Germany
Developments leading up to the year 2000
Rosenblatt, Joachim 3/6

Data on the fast track
The Danish State Railroad employs time-division multiplexing systems to upgrade and modernize its telecommunications network
Bech, Jörn; Merz, Gerhard 3/21

Bringing city communications to the country
Small digital exchanges bring full subscriber services to suburban and rural areas
Genzone, Enrique; Schulte, Rainer 3/36

Increased speed in packet networks
Economical data transmission at 2 Mbit/s in the EWSP packet switching system
Geuens, Leoplod; Hausmann, Herbert 3/40

PCNs: a smart way to enlarge European mobile radio networks?
A look at the prospects of personal communications networks in Europe
Huber, Josef Franz 4/26

EWSD's built-in expert
A real-time expert system simplifies the maintenance of EWSD exchanges in Belgium
Feicht, Ernst J.; Lux, Herman 4/42

How communications networks are getting smarter
Strategies for the introduction of intelligent network architectures
Christensen, Bernd; Underwood, Derek 5/22

Pacemaker for broadband communications
Asynchronous transfer mode technology will accelerate the introduction of broadband services
Fundneider, Oswald 5/26

Network-to-network
Linking local networks to form metropolitan area networks eases the way for broadband ISDN
Kraft, Ingo; Schenk, Heinrich 5/30

Message sequence chart
A new standard language for the specification of complex communication systems
Kausche, Andreas; Rudolph, Ekkart 5/49

The world of mobile communications
A look at the prospects for public and private mobile radio
Becker, Karl-Fritz; Heim, Richard 6/5

A new data highway links Jakarta to Bandung
P.T.Telekom Indonesia modernizes a major national data link
Merz, Gerhard 6/12

Europe's first MAN goes to Denmark
Public high-speed data network using DQDB standard handed over in Copenhagen
Knopf, Friedrich 6/17

Turnkey '91 – the rebuilding of a network
The crash program for the modernization and expansion of eastern Germany's telecommunications infrastructure
Jenschor, Lothar; Köstler, Günter; Schwinghammer, Helmut 6/30

Putting EWSD to the test
Complex investigations ensure electromagnetic compatibility (EMC) of the electronic digital switching system EWSD
Born, Juergen; Keim, Siegfried; Werner, Helmut 6/38

Service

Knowledge the key to using technology
Training Center for Communication Networks at the leading edge for 40 years
Feicht, Ernst J.; Jenni, Armin A. 2/48

Service spelled out in Chinese
Successful start for the Beijing Technology Training Center
Jenneskens, Uwe 6/44

Synchronous digital hierarchy

Gateway to the gigabit range
Berlin V pilot project tests 2.5-Gbit/s digital transmission on optical fibers to the SDH standard
Proebster, Walter 3/32

Impulses for SDH radio
Siemens Telecomunicazioni introduces innovations in microwave technology for synchronous digital hierarchy radio
Bonato, Paulo; Buoli, Carlo; Filiberti, Gaudenzio; Giavarini, Andrea 4/34

SDH: the transmission network of tomorrow
Synchronous digital hierarchy (SDH) brings greater flexibility to equipment and network topologies
Bruckböck, Peter 5/38

New measuring technology for SDH
The K4302 generator/analyzer together with the K9302 optical interface supports the development, production, commissioning and maintenance of digital transmission equipment to SDH standard
Fink, Helmuth; Rauchenecker, Konrad 5/46

Transmission systems

Network node of the future
The NK2000 – a non-blocking, controllable multiplex and distribution unit with monitoring function
Schmid, Ulrich 2/32

Third generation multiplexing
New C generation multiplexer family for plesiochronous digital signals
Fütterer, Hans-Georg; Junghardt, Helmut 2/40

Guaranteeing B-ISDN transmission quality internationally
PARASOL consortium develops measurement technology for the future broadband network
Arweiler, Hans Werner 2/44

Down to earth satellite communications
Siemens expands the role of the Raisting earth station to perform remote monitoring and control of INTELSAT communications satellites
Scherner, Ulrich; Thiere, Helmuth 3/29

Gateway to the gigabit range
Berlin V pilot project tests 2.5-Gbit/s digital transmission on optical fibers to the SDH standard
Proebster, Walter 3/32

Dependable fiber-optic transmission
Overhead channel evaluation at 3 Mbit/s with the SG30H service unit
Baardsgaard, Lars; Dömer, Josef; Müller, Karl 3/44

Taking the factory to the people
Opening ceremony for Siemens Übertragungssysteme GmbH Greifswald – Siemens' new Transmission Systems factory in Eastern Germany
Hurnaus, Josef 3/52

One approach to all submarine cables
Concept based on the MINISUB system proves commercially viable
Giebel, Wolfgang 4/22

High-tech over Italy
ITALSAT packed with Siemens transmission equipment
D'Ambrosio, Alessandro 4/30

Impulses for SDH radio
Siemens Telecomunicazioni introduces innovations in microwave technology for synchronous digital hierarchy radio
Bonato, Paulo; Buoli, Carlo; Filiberti, Gaudenzio; Giavarini, Andrea 4/34

Making the most of subscriber lines
PCM4 offers a low-cost solution to expanding basic services in saturated outside plants
Ferretti, Vittorio; Wichmann, Guillermo 4/46

SDH: the transmission network of tomorrow
Synchronous digital hierarchy (SDH) brings greater flexibility to equipment and network topologies
Bruckböck, Peter 5/38

Fiber-optic transmission with reserve capacity
Modular OLTS system with 2, 8 or 34 Mbit/s
Baardsgaard, Lars; Gilinsky, Odd; Trüg, Wolf 5/42

4.7-GHz radio leads the way in South America
Brazil, Bolivia and Colombia exploit a novel radio frequency range for the modernization of their long-distance routes
Ferretti, Vittorio 6/20

Transmission capacity on demand
DACS system PN64 improves transmission network flexibility with fast remote controlled line switchover
Baardsgaard, Lars; Tolleshaug, Nils; Trüg, Wolf 6/34
